Organizational Capacity Index

Capacity Coach report: your plan, then your detailed results

Riverbend Violence Interruption Network (synthetic sample)

2026-11-04 01:25 UTC

Completed by: Executive director

Community Safety Fund | Everytown for Gun Safety

Generated from synthetic or scrubbed data for the AWS Breaking Barriers demo.

Recommendations generated with AI (Claude on Amazon Bedrock) from your answers and the CVI resource library. Scores are calculated by a fixed scoring method.

PART 1: YOUR PLAN

A letter to Riverbend Violence Interruption Network (synthetic sample)

Dear Riverbend Violence Interruption Network (synthetic sample) team,

Thank you for taking the Organizational Capacity Index. Here is what I learned about you, what you already do well, and where I would start. Your detailed results come after this letter.

What we learned about you

This plan is based on your answers.

Mid-size, founded 2016, 19 staff, about $2.1M budget. An established CVI provider operating hospital-based intervention and street outreach across two precincts.

What's true about you

Here's what I've learned about you. Riverbend has been doing this work since 2016. You run hospital-based intervention and street outreach with 19 staff and about $2.1 million a year. Your core systems exist and your team uses them. They are just uneven. Most of your money, roughly 80 percent, is restricted government funding. Your board works well but is thin on finance know-how. This assessment is a learning tool, not a grade.

You are strong in Planning and Financial Management. Both are at the Developing stage. You keep written work plans and check your progress against them. You produce financial reports that leaders and the board review. You track spending by program and funding stream, and you do independent audits every year. You also have a written fundraising plan, funding that lasts more than one year, and a balance of restricted and flexible money. On the data side, you have defined outcomes, you use standard tools, and you review data as a team.

You are a little weaker in Fundraising and in Monitoring, Learning and Evaluation. Both are at the Emerging stage. The biggest growth priorities are in seeing your funding clearly over the next year, and in helping all staff collect and use data the same way. Evaluation is still mostly counting outputs, like contacts and referrals. Many of your other growth priorities, such as larger grants, more kinds of funders, and a staff lead for data, sit on top of these two.

If I were you, I would start with two things. First, build one clear picture of where your funding will come from over the next 12 months. Second, help every staff member in both the hospital and street outreach teams collect data the same way. These two steps are small enough for a busy team. They also build the base for funding that lasts and for proving your impact.

What you already do well

- Your planning habits are solid. You keep written work plans, update them and check progress against them.

- You keep a written fundraising plan and have funding commitments that last beyond one year. You also have a balance of restricted and flexible money.
- Your finances get regular attention. Leaders and the board review reports, you track spending by program and funding stream, and you do independent audits every year.
- You have defined outcomes for your programs, you track progress toward them, and you use standard data tools.
- You review data as a team, use it to improve programs, and share it with funders and partners.

If I were you, I would start with

1. Map your funding for the next 12 months

About 80 percent of your money is restricted government funding. That makes it very important to see clearly what is confirmed, what is pending and when each grant ends. You already have a fundraising plan and longer-range thinking, so this step turns that into one page your whole leadership team can see. It also helps you decide which hiring and program promises are safe to make.

Based on your answers to: We have visibility into funding sources covering at least the next year.

What to do

- List every funding source with its amount, what it can be used for, and its end or renewal date.
- Mark each source as confirmed, pending or at risk, and show the month each dollar is expected.
- Compare the map to your program promises for the hospital and street outreach teams, and note any months with a gap.
- Review the page at a monthly leadership meeting and update it each time news comes in.

Resource: ARCvi: Finding and Sustaining Funding

2. Help all staff collect data the same way

You already use standard tools and review data as a team. But the assessment shows staff are not yet trained to collect and use data in the same way. Your hospital team and your street outreach team work in very different settings, so each may record things differently. Clean, steady data is what lets you show funders your impact and move past counting outputs.

Based on your answers to: Staff are trained to collect and use data consistently.

What to do

- Write a short, plain guide that says what to record, when, and in which tool, for hospital staff and outreach staff.
- Hold one short training for each team, using real examples from their daily work.
- Ask supervisors to check data entry in one-on-one meetings, as a support and not a punishment.
- Keep it light. Design the steps so they fit the way frontline staff already work.

Resource: ARCvi: Using Data That Matters

Your next 12 weeks

You do not get it all at once. Your roadmap gives you a few steps each week, and the next week opens when you finish one (or after 7 days). Check off steps on your plan page.

This week, week 1: Map your funding for the next 12 months

- List every funding source with its amount, what it can be used for, and its end or renewal date. (Leadership team)
- Mark each source as confirmed, pending or at risk, and show the month each dollar is expected. (Leadership team)

Coming up, week 2: Map your funding for the next 12 months (continued)
Coming up, week 3: Help all staff collect data the same way

How the Community Safety Fund can help

- Ask for training or coaching in the areas you choose. Use "Ask the Community Safety Fund for support" on your online report.
- Ask us to connect you with groups like yours: a similar program model, size and growth priorities. We share names only when both groups agree.
- Share this letter with your team, your board, a funder or a trainer. Talk it through together.

With you in the work,
Your Capacity Coach, for the Everytown Community Safety Fund

Behind the plan: your detailed results

The letter gave you the short version. These pages hold the numbers behind it: your stages and scores by area, the full 30 / 60 / 90 day plan, every growth priority with next steps, a team conversation guide, and a record of every answer. Scores come from a fixed scoring method.

Reading level of your letter: about grade 6 (Flesch-Kincaid formula). We aim for grade 8 or lower.

Organization profile

Mid-size, founded 2016, 19 staff, about $2.1M budget. An established CVI provider operating hospital-based intervention and street outreach across two precincts. Core systems exist and are used, but they are uneven: the board is functioning yet thin on finance expertise, and evaluation is still mostly output counting. Roughly 80% of revenue is restricted government funding.

Assessment overview

Statements assessed	Growth priorities	High	Medium	Low
72	32	11	11	10

Overall favorable response rate: 55.6% (40 of 72 statements). The per-domain percentages below are the figures used in planning; the overall rate is a headline only and is not an input to any scoring decision.

Domain results

Domain	Estimated stage	Capacity	Growth priorities	High priority
PL · Planning	Developing	66.7%	5 / 15	0
FR · Fundraising	Emerging	45.0%	11 / 20	8
FM · Financial Management	Developing	65.0%	7 / 20	2
ML · Monitoring, Learning & Evaluation	Emerging	47.1%	9 / 17	1

Stage key

1. Seeding: Early formation. Activity is reactive and largely informal; systems are not yet written down.

2. Emerging: First structures appear. Basic documents and routines exist but are applied unevenly.

3. Developing: Systems are in place and used consistently across the organization.

4. Strengthening: Systems are mature, integrated with one another, and actively managed.

5. Transformational: The organization operates as a sector model and supports the growth of peer organizations.

30 / 60 / 90 day action plan

First 30 days

Build the 12-month funding map

Owner: Executive director with the bookkeeper

Why: With most of your money restricted and tied to government grants, you need one clear view of what is confirmed and what is at risk.

- Put every funder, amount, use limits and end date on one page.
- Label each source confirmed, pending or at risk.
- Share the page with your leadership team and agree on who updates it each month.

Based on: FR7

Resource: ARCvi: Finding and Sustaining Funding https://arcvi.org/finding-and-sustaining-funding/

Write a simple data guide for both teams

Owner: Program manager

Why: Staff need the same rules for recording data before training can help. Your assessment shows consistent data use is a growth priority.

- List the 5 to 8 things every staff member must record for hospital work and for street outreach.
- Write plain definitions and one example for each.
- Ask two frontline staff to test the guide and say what is confusing or too long.

Based on: ML6, ML15

Resource: ARCvi: Using Data That Matters https://arcvi.org/using-data-that-matters/

Make a calendar for tax filings and audit follow-up

Owner: Bookkeeper or finance lead

Why: Filing on time and learning from audits are growth priorities, and your board has limited finance expertise. A clear calendar and owner lowers risk.

- List every tax and financial filing due this year, with dates and who is responsible.
- Pull up your last audit and list any findings and what was done about each.
- Ask outside help, such as an accountant, to review the calendar if no one on staff is sure.

Based on: FM10, FM9

Resource: Governance and Related Topics: 501(c)(3) Organizations https://www.irs.gov/pub/irs-tege/governance_practices.pdf

Days 31 to 60

Train staff and reinforce data habits in supervision

Owner: Program manager with team supervisors

Why: The guide only works if people use it. Supervision is a steady, supportive place to build the habit.

- Hold a short training for the hospital team and one for the street outreach team.
- Add one data question to each one-on-one supervision.
- Once a month, spot-check a few records and give friendly feedback.

Based on: ML6, ML15

Resource: ARCvi: Using Data That Matters https://arcvi.org/using-data-that-matters/

Name a fundraising lead and map your funders by sector

Owner: Executive director and board chair

Why: Heavy reliance on government grants is your main exposure. Someone needs clear time and ownership to widen the mix.

- Choose one person, on staff or a consultant, to own fundraising and give them protected time.
- Sort current funders into government, foundation, hospital, business and individual donors, and find the empty spots.
- Pick two or three new funders to build a relationship with before you apply.
- In your next proposals, ask for general operating support and multi-year terms.

Based on: FR15, FR11, FR12

Resource: ARCvi: Finding and Sustaining Funding https://arcvi.org/finding-and-sustaining-funding/

Stretch your budget out to two or three years

Owner: Executive director with the bookkeeper

Why: Your 12-month view should grow into a longer one. That supports your planning, your audits and your talks with funders.

- Use your funding map to project income for years two and three.
- Use the costing guide to include supervision, data, training and indirect costs, not only salaries.
- Show best-case and worst-case versions, such as what happens if your biggest grant ends.
- Share it with the board finance members.

Based on: FM11, PL13, FR7

Resource: Hospital-Based Violence Intervention Programs: A Guide to Implementation and Costing (2024) https://everytownresearch.org/report/hospital-based-violence-intervention-programs

Days 61 to 90

Choose a few outcome questions and tell your story with data

Owner: Program manager with the executive director

Why: Your evaluation is mostly output counting. With steadier data, you can start to show changes in safety and well-being and use it with funders.

- Pick two or three questions you most want data to answer, such as how long participants stay engaged.
- Ask staff and community members what success looks like to them.
- Name one person to own data and evaluation, and look for a small research or learning partner if useful.
- Put one clear number and one consent-based participant story in your next funder report.

Based on: ML12, ML10, ML11

Resource: ARCvi: The Evidence https://arcvi.org/the-evidence/

Plan for longer-lasting and more flexible funding

Owner: Executive director with fundraising lead

Why: Reserves, multi-year funding and flexible dollars protect staff jobs if one grant ends.

- Set a simple goal for reserves or flexible funds, based on your multi-year budget.
- Talk with your hospital partners about how they might support or co-fund the hospital-based work.
- Find out whether your state is looking at Medicaid payment for CVI services. If so, begin improving your service notes now.

Based on: FR17, FR12, FR10

Resource: Medicaid reimbursement for community violence intervention and prevention: a multi-state policy implementation case study (2025) https://doi.org/10.1186/s40352-025-00327-7

Add finance know-how to your board

Owner: Board chair

Why: Your board works well but is thin on finance experience. Help here supports audits, filings and funding growth.

- Name the finance skills you need, such as budgeting, audits or grant financials.
- Ask your network for one volunteer advisor or a new board member with those skills.
- Give them a short orientation on your programs and your funding map.

Based on: FM9, FM11

Resource: Governance and Related Topics: 501(c)(3) Organizations https://www.irs.gov/pub/irs-tege/governance_practices.pdf

Priority action plan

The 12 highest-scoring growth priorities across all assessed domains, ranked by priority score. Full domain-by-domain detail follows.

#	ID	Domain	Statement	Score	Priority
1	FR7	Fundraising	We have visibility into funding sources covering at least the next year.	4.65	High
2	FR8	Fundraising	We secure grants at moderate funding levels (e.g., $25,000–$75,000).	4.65	High
3	ML6	Monitoring, Learning & Evaluation	Staff are trained to collect and use data consistently.	3.67	High
4	FR10	Fundraising	We secure grants at higher funding levels (e.g., $75,000+).	3.10	High
5	FR11	Fundraising	We have a diverse base of multi-year funders across sectors.	3.10	High
6	FR12	Fundraising	A meaningful portion of our funding is flexible and can be used strategically.	3.10	High
7	FR15	Fundraising	We have dedicated capacity (staff or consultant) focused on fundraising.	3.10	High
8	FR16	Fundraising	We secure at least some large grants (e.g., $75,000+ or higher).	3.10	High
9	FR17	Fundraising	We have taken steps to build long-term financial sustainability (e.g., reserves, multi-year funding).	3.10	High
10	FM9	Financial Management	We have been audited more than once and have improved based on findings.	2.70	High
11	FM10	Financial Management	We file required taxes and financial documents accurately and on time.	2.70	High
12	FM11	Financial Management	We develop multi-year budgets and financial projections.	2.70	Medium

Recommendations by domain

Every growth priority, grouped by domain and ordered by priority score. Domains with no growth priorities are listed as complete and carry no recommendations.

PL · Planning

Capacity 66.7% | Estimated stage: Developing | Growth priorities: 5 of 15

[Medium] PL10: We are actively developing a strategic plan.

Stage: Strengthening · Priority score: 2.67

Suggested next steps:

- Define 2–3 year priorities and outcomes
- Engage staff and stakeholders in shaping direction
- Use a structured planning template or facilitator

[Medium] PL11: We have a 2–3 year strategic plan that includes a multi-year budget, capacity building, and sustainability strategies.

Stage: Strengthening · Priority score: 2.67

Suggested next steps:

- Develop a multi-year plan with clear goals and strategies
- Align budget projections with strategic priorities
- Identify capacity and sustainability needs

[Medium] PL13: We have a clear understanding of where funding will come from for the next 2 or more years.

Stage: Strengthening · Priority score: 2.67

Suggested next steps:

- Project funding across a 2+ year period
- Identify and pursue multi-year funding opportunities
- Align growth decisions with long-term funding expectations

[Low] PL14: We are implementing our second or subsequent strategic plan.

Stage: Transformational · Priority score: 1.33

Suggested next steps:

- Document lessons learned from your current or first plan
- Use those insights to strengthen your next planning cycle
- Establish a repeatable planning → implementation → reflection process

[Low] PL15: We serve as a model for other organizations in planning and strategy.

Stage: Transformational · Priority score: 1.33

Suggested next steps:

- Identify and document one strong planning practice
- Share tools or lessons learned with peers
- Participate in peer learning opportunities

FR · Fundraising

Capacity 45.0% | Estimated stage: Emerging | Growth priorities: 11 of 20

[High] FR7: We have visibility into funding sources covering at least the next year.

Stage: Developing · Priority score: 4.65

Suggested next steps:

- Map expected funding across a 12-month period
- Identify confirmed vs. pending sources
- Align program commitments with funding expectations

[High] FR8: We secure grants at moderate funding levels (e.g., $25,000–$75,000).

Stage: Developing · Priority score: 4.65

Suggested next steps:

- Identify funders that operate at this funding range
- Strengthen proposals with clearer outcomes and impact data
- Leverage partnerships or introductions to access larger opportunities

[High] FR10: We secure grants at higher funding levels (e.g., $75,000+).

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Identify funders aligned with larger-scale investments
- Strengthen organizational narrative, outcomes, and financials
- Build relationships before applying for higher-value opportunities

[High] FR11: We have a diverse base of multi-year funders across sectors.

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Map current funders and identify gaps by sector
- Target new funders across foundations, government, and private sector
- Strengthen relationship management with existing supporters

[High] FR12: A meaningful portion of our funding is flexible and can be used strategically.

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Request general operating support in proposals
- Communicate organizational priorities beyond individual programs
- Track and increase flexible funding over time

[High] FR15: We have dedicated capacity (staff or consultant) focused on fundraising.

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Assign fundraising responsibility to a specific team member
- Use external support (consultants, partners) as needed
- Build internal fundraising skills through training and tools

[High] FR16: We secure at least some large grants (e.g., $75,000+ or higher).

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Target funders known for larger investments
- Strengthen organizational infrastructure and financial reporting
- Build relationships over time before applying

[High] FR17: We have taken steps to build long-term financial sustainability (e.g., reserves, multi-year funding).

Stage: Strengthening · Priority score: 3.10

Suggested next steps:

- Identify opportunities to build reserves or flexible funding
- Prioritize multi-year funding relationships
- Develop a sustainability strategy aligned with growth

[Medium] FR18: Our fundraising plan has been implemented and refined over time.

Stage: Transformational · Priority score: 1.55

Suggested next steps:

- Implement your existing plan and track progress
- Review results annually and refine strategies
- Document lessons learned to strengthen future efforts

[Low] FR19: We have more than one person supporting fundraising efforts.

Stage: Transformational · Priority score: 1.55

Suggested next steps:

- Engage leadership, board, or staff in fundraising roles
- Define clear responsibilities for fundraising activities
- Build a team-based approach over time

[Low] FR20: We have secured at least one very large grant (e.g., $150,000+).

Stage: Transformational · Priority score: 1.55

Suggested next steps:

- Identify funders that provide large-scale investments
- Strengthen proposals with strong outcomes and financials
- Build long-term relationships before pursuing large grants

FM · Financial Management

Capacity 65.0% | Estimated stage: Developing | Growth priorities: 7 of 20

[High] FM9: We have been audited more than once and have improved based on findings.

Stage: Strengthening · Priority score: 2.70

Suggested next steps:

- Address any prior audit findings
- Strengthen financial systems and documentation
- Plan for ongoing audits as funding grows

[High] FM10: We file required taxes and financial documents accurately and on time.

Stage: Strengthening · Priority score: 2.70

Suggested next steps:

- Identify filing requirements and deadlines
- Assign responsibility for compliance
- Engage external support if needed

[Medium] FM11: We develop multi-year budgets and financial projections.

Stage: Strengthening · Priority score: 2.70

Suggested next steps:

- Extend your budget planning beyond one year
- Align projections with funding pipeline
- Use projections to guide hiring and growth

[Low] FM17: Our audits demonstrate consistent financial strength over time.

Stage: Transformational · Priority score: 1.35

Suggested next steps:

- Address recurring audit issues
- Strengthen internal controls and documentation
- Build consistency in financial practices

[Low] FM18: Our financial planning and performance are transparent and understood by stakeholders.

Stage: Transformational · Priority score: 1.35

Suggested next steps:

- Share financial summaries with staff and board
- Communicate key financial priorities
- Build financial literacy across the organization

[Low] FM19: We complete audits in a timely manner following the close of the fiscal year.

Stage: Transformational · Priority score: 1.35

Suggested next steps:

- Establish a clear audit timeline
- Prepare documents in advance
- Coordinate closely with auditors

[Low] FM20: Our organization is recognized for strong financial management practices.

Stage: Transformational · Priority score: 1.35

Suggested next steps:

- Strengthen consistency in financial systems
- Document and share best practices
- Build credibility with funders and partners

ML · Monitoring, Learning & Evaluation

Capacity 47.1% | Estimated stage: Emerging | Growth priorities: 9 of 17

[High] ML6: Staff are trained to collect and use data consistently.

Stage: Developing · Priority score: 3.67

Suggested next steps:

- Provide basic training on data collection tools and processes
- Create simple guidelines for data entry and use
- Reinforce expectations through supervision

[Medium] ML10: We use data to support fundraising and external communications.

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Incorporate data into proposals and reports
- Highlight outcomes and impact in communications
- Align data with funder priorities

[Medium] ML11: We have staff or dedicated capacity responsible for data and evaluation.

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Assign data responsibilities to a staff member
- Build internal capacity over time
- Use external support where needed

[Medium] ML12: We assess program effectiveness beyond outputs (e.g., changes in behavior, safety, or outcomes).

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Define indicators that reflect deeper impact
- Collect qualitative and/or outcome-based data
- Use findings to refine program design

[Medium] ML13: We partner with external evaluators, researchers, or learning partners when appropriate.

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Identify potential academic or research partners
- Explore opportunities for evaluation support
- Start with small, focused evaluation efforts

[Medium] ML14: We use data and learning to adapt programs over time.

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Document lessons learned from data reviews
- Make adjustments to program design
- Track changes and their impact

[Medium] ML15: We have systems in place to ensure data quality and consistency.

Stage: Strengthening · Priority score: 2.45

Suggested next steps:

- Create basic data entry standards
- Review data for accuracy regularly
- Provide feedback to staff

[Low] ML16: We have a learning agenda or set of questions guiding our evaluation efforts.

Stage: Transformational · Priority score: 1.22

Suggested next steps:

- Identify 2–3 key questions you want to answer
- Align data collection to those questions
- Use findings to guide strategy

[Low] ML17: We contribute data, insights, or practices to broader field learning.

Stage: Transformational · Priority score: 1.22

Suggested next steps:

- Share findings with partners or networks
- Participate in learning communities
- Document and share promising practices

Team conversation guide

1. If our largest government grant ended in six months, which jobs and programs would be at risk, and what would we do first?
2. Who on our team could own fundraising, and what would we need to take off their plate to give them time?
3. What is the one thing we most want our data to tell us about the difference we make for participants?
4. Do our hospital team and our street outreach team record their work the same way? What would make it easier for them?
5. What finance skills does our board need, and who do we know who could help?

Appendix A: Full response record

The complete answer set submitted for Riverbend Violence Interruption Network (synthetic sample): all 72 statements, in questionnaire order. "Favorable" means the answer did not register a growth priority. For reverse-coded statements (marked †) the favorable answer is No.

PL · Planning

ID	Statement	Answer	Stage	Favorable
PL1	We primarily focus on short-term planning and activities. †	No	1	Yes
PL2	We have written work plans, a logic model, or a strategy plan to guide our work.	Yes	2	Yes
PL3	Staff across the organization can clearly articulate our goals.	Yes	2	Yes
PL4	We have clarity on where funding will come from to support our programs for at least the next 6–12 months.	Yes	2	Yes
PL5	We maintain written work plans that guide activities over the next 6–12 months.	Yes	3	Yes
PL6	We consistently monitor progress against our written work plans.	Yes	3	Yes
PL7	We maintain written documents that describe our mission, context, strategies, budget, and policies.	Yes	3	Yes
PL8	We regularly develop and update our work plans.	Yes	3	Yes
PL9	We have a clear understanding of where funding will come from for the next year.	Yes	3	Yes
PL10	We are actively developing a strategic plan.	No	4	Growth priority
PL11	We have a 2–3 year strategic plan that includes a multi-year budget, capacity building, and sustainability strategies.	No	4	Growth priority
PL12	Our strategic plan is updated regularly and connected to operational or work plans.	Yes	4	Yes
PL13	We have a clear understanding of where funding will come from for the next 2 or more years.	No	4	Growth priority
PL14	We are implementing our second or subsequent strategic plan.	No	5	Growth priority

ID	Statement	Answer	Stage	Favorable
PL15	We serve as a model for other organizations in planning and strategy.	No	5	Growth priority

FR · Fundraising

ID	Statement	Answer	Stage	Favorable
FR1	We have a base of financial supporters who contribute to our work.	Yes	1	Yes
FR2	We generate financial resources beyond in-kind support (e.g., volunteer time, donated space).	Yes	1	Yes
FR3	We have clarity on where funding will come from over the next 6–12 months.	Yes	2	Yes
FR4	We secure grants that meet or exceed small-dollar thresholds (e.g., $10,000+).	Yes	2	Yes
FR5	We receive funding commitments that extend beyond one-time or single-year support.	Yes	2	Yes
FR6	We maintain a balance of restricted and flexible (unrestricted) funding.	Yes	3	Yes
FR7	We have visibility into funding sources covering at least the next year.	No	3	Growth priority
FR8	We secure grants at moderate funding levels (e.g., $25,000–$75,000).	No	3	Growth priority
FR9	We have a mix of multi-year donors and funding sources that support both programs and operations.	Yes	3	Yes
FR10	We secure grants at higher funding levels (e.g., $75,000+).	No	4	Growth priority
FR11	We have a diverse base of multi-year funders across sectors.	No	4	Growth priority
FR12	A meaningful portion of our funding is flexible and can be used strategically.	No	4	Growth priority
FR13	We have a written fundraising or resource development plan.	Yes	4	Yes
FR14	We have visibility into funding sources over a 3-year horizon.	Yes	4	Yes

ID	Statement	Answer	Stage	Favorable
FR15	We have dedicated capacity (staff or consultant) focused on fundraising.	No	4	Growth priority
FR16	We secure at least some large grants (e.g., $75,000+ or higher).	No	4	Growth priority
FR17	We have taken steps to build long-term financial sustainability (e.g., reserves, multi-year funding).	No	4	Growth priority
FR18	Our fundraising plan has been implemented and refined over time.	No	5	Growth priority
FR19	We have more than one person supporting fundraising efforts.	No	5	Growth priority
FR20	We have secured at least one very large grant (e.g., $150,000+).	No	5	Growth priority

FM · Financial Management

ID	Statement	Answer	Stage	Favorable
FM1	We use an accounting system (software or structured tools) to manage our finances.	Yes	1	Yes
FM2	Financial responsibilities are shared to ensure oversight and accountability.	Yes	1	Yes
FM3	We develop and manage an annual organizational budget.	Yes	2	Yes
FM4	We are able to meet payroll and financial obligations consistently.	Yes	2	Yes
FM5	We have completed at least one independent financial review or audit.	Yes	3	Yes
FM6	We track financial performance and compare actuals to our budget.	Yes	3	Yes
FM7	We have financial controls in place to manage risk and ensure accountability.	Yes	3	Yes
FM8	We produce financial reports (e.g., income statement, balance sheet) and review them regularly.	Yes	3	Yes
FM9	We have been audited more than once and have improved based on findings.	No	4	Growth priority

ID	Statement	Answer	Stage	Favorable
FM10	We file required taxes and financial documents accurately and on time.	No	4	Growth priority
FM11	We develop multi-year budgets and financial projections.	No	4	Growth priority
FM12	We manage financial reserves, assets, or investments to support sustainability.	Yes	4	Yes
FM13	Financial reports are reviewed regularly by leadership and/or the governing body.	Yes	4	Yes
